

Material Transfer Basket

Two pallets of brick can be easily lifted up to the burn floor to keep installation progressing.

The Material Basket is a strong, lightweight aluminum-frame that will keep contents stable, secure, and contained. For carrying tools, machines, rubble, or up to two pallets of brick. Can be lifted or carried with crane or forklift.

MATERIAL HANDLING

HEAVY DUTY CAPACITY

The 4,535 kg (10,000 lb) capacity allows for 2 pallets of brick, tools, equipment and more.

SAFETY

Safer than free lifting pallets with a crane. Keeps contents stable, secure, and contained

CUSTOM MADE

Each plant has unique problems and we can design and manufacture a solution that works to any specific need. All material baskets are designed by engineers and manufactured by certified welders using T6-6061 aluminum.

Since 1968,

we've been dedicated to enhancing the safety and efficiency of refractory maintenance crews around the world. We are the only manufacturer to offer a full-system, start-to-finish approach, from bricking machines and safety cages to conveyors and ramps. Our custom-design service ensures no matter what crews are up against, they have the equipment they need to minimize downtime and ensure everyone goes home uninjured each day.

HOW IT WORKS

Lift and carry with a crane or forklift. Heavy duty screening keeps loose items safely contained such as: open pallets, tools, machines, or rubble.
